ANTIQUE DISTRESSING

Available in Platinum and Gold

Expert craftsmanship creates this antique look by lightly distressing the wood for a subtle, worn appearance. This decorative art form gives the wood a slightly aged feel, adding character and a one-of-a-kind patina. Characteristics inherent in this technique include sanded corners/profiles of doors and drawer fronts, as well as small dings and dents.

Antique Distressing available on cherry, knotty alder, maple and rustic maple with glaze and highlight finish in our standard offering. Rustic maple not available in Platinum.

PLYWOOD

We ensure that our plywood meets or exceeds the highest standards for air quality (including TSCA Title VI and CARB emissions standards).

For plywood upgrade cabinets, we use only the highest grade materials, including two types of plywood:

- Traditional plywood with an all-fir-crossband core has an ideal strength-to-weight ratio for many cabinet parts, so it is used for end panels, shelves, I-beams, hanging rails, etc.
- Engineered plywood with an MDF crossband core creates a superior surface for accepting stains and paints, so it is used for finished surfaces such as finished ends and matching finished interiors.
